SCOPE

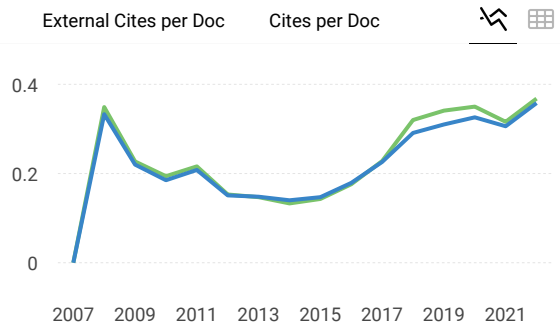

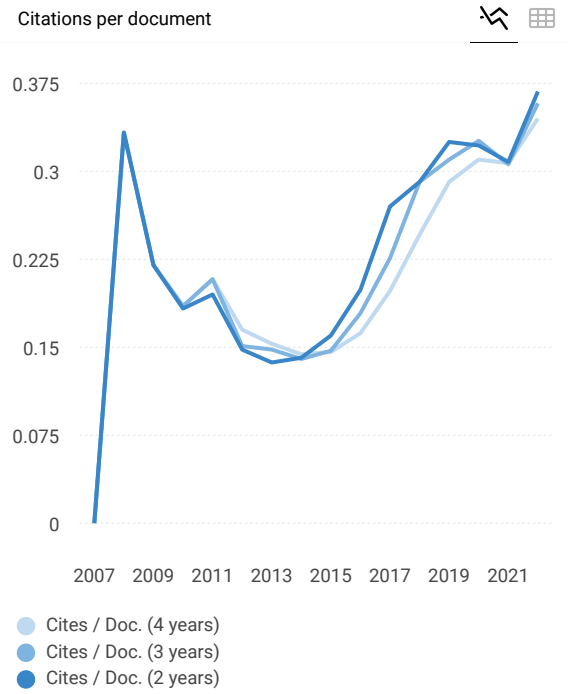

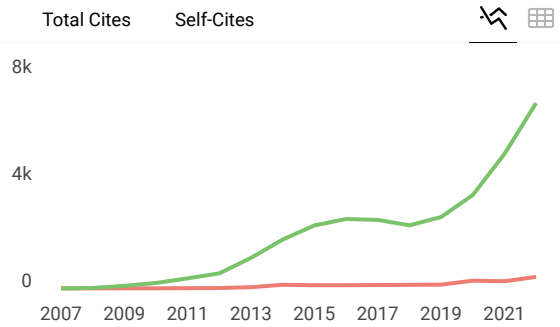

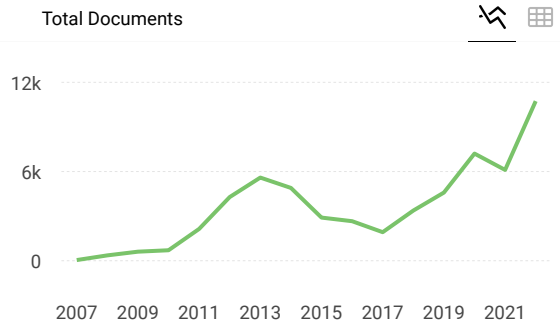

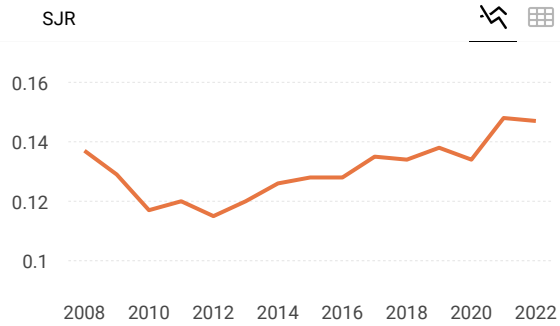

The book series Lecture Notes in Electrical Engineering (LNEE) publishes the latest developments in Electrical Engineering - quickly, informally and in high quality. While original research reported in proceedings and monographs has traditionally formed the core of LNEE, we also encourage authors to submit books devoted to supporting student education and professional training in the various fields and applications areas of electrical engineering. The series cover classical and emerging topics concerning: -Communication Engineering, Information Theory and Networks- Electronics Engineering and Microelectronics- Signal, Image and Speech Processing- Wireless and Mobile Communication- Circuits and Systems- Energy Systems, Power Electronics and Electrical Machines- Electro-optical Engineering- Instrumentation Engineering- Avionics Engineering- Control Systems- Internet-of-Things and Cybersecurity- Biomedical Devices, MEMS and NEMS

Dear sir/Madam

I am writing on behalf of the Scientific Affairs Office, my University, to initiate a cooperation with you as a publisher to our coming conference. I would be grateful if you guide me to the primary (academic and financial) steps required for the prospective authors and committees.

Looking forward to hearing from you.

Hello, thank you for answer (comment below).

Would be possible to provide us information regarding quartiles showed here with relation to the Scopus? From which metric do you calculate/gather it?

Its simply graphical representation of Scopus Citate Rank for selected year (<https://www.scopus.com/sourceid/19700186822?origin=recordpage#tabs=0> information at the bottom of the page)?

Thank you for answer.

SCImago Team

Dear Sir/Madam,

Thank you for contacting us.

As you probably already know, our data come from Scopus, they annually send us an update of the data. This update is sent to us around April / May every year.

The calculation of the indicators is performed with the copy of the Scopus database provided to us annually. However, the methodology used (concerning the distribution by Quartiles) by Scopus is different from the one used by SCImago, even if, since the past year, the scientometrics indicators' calculation procedure changed in order to resemble SciVal.

For every journal, the annual value of the SJR is integrated into the distribution of SJR values of all the subject categories to which the journal belongs. The distribution by Quartiles cannot be considered over the journals' total amount within a Category. In the case of SCImago, the distribution has to be considered with the formula Highest-SJR minus Lowest-SJR divided into four.

Fof further information about methodological issues, please consult our "About" Section
