DAFTAR PUSTAKA

Amanto H., dan Daryanto, 1999 Ilmu bahan, cetakan pertama, Bumi aksara.

Aninda, R. K., Karobi, S. M., Shariar, R., Rahman, Md. M., & Rabby, I. I. (2023). Effect of a Post-Weld Heat Treatment on The Mechanical Properties and Microstructure of Mild Steel Joints Welded by the Electric Arc Welding. *Journal of Engineering Research*. https://doi.org/10.1016/j.jer.2023.10.012

Farhan, M., Wilarso, W., Domodite, A., & Surya, A. (2024). Analysis of GTAW and FCAW Welding in Impact Testing in Steel Micro Structures. *JMEMME (Journal of Mechanical Engineering, Manufactures, Materials and Energy)*, *8*(2), 166–180. https://doi.org/10.31289/jmemme.v8i2.11772

Hazazi, M. I., Lubis, S.(2025). Perlakuan *Post Weld Heat Treatment* (PERLAKUAN PANAS PASCA PENGELASAN)) Baja SS400 Terhadap Kekerasan Dan Struktur Mikro. *Jurnal Pendidikan Teknik Mesin Undiksha*, *13*(2), 267–274. https://doi.org/10.23887/jptm.v13i2.94547

Herdianto, A. N. T., Suheni, S., & Rosidah, A. A. (2024). Effect of Welding Current and Electrode Movement on HAZ Width and Hardness of TIG Welded 304 Stainless Steel. *Journal of Applied Sciences, Management and Engineering Technology*. https://doi.org/10.31284/j.jasmet.2024.v5i1.5884

Indrawan, M., & Santosa, A. (2023). Analysis of the effect of current and cooling media in tungsten inert gas (tig) welding on mechanical strength and micro structure of aisi 1045 steel for truss frame motorcycle frame connections. *Journal of Mechanical and Manufacture*, *3*(1), 56–70. https://doi.org/10.31949/jmm.v3i1.6602

Kou, F., & Huang, X. (2024). Current Research Situation and Prospect of Wire and Arc Additive Manufacturing of Titanium Alloy. *Journal of Engineering*, *2*(2), 39.

Lancaster. (2018). *Fracture Toughness Characterization for Heat-Affected Zones of Welded Highway Bridge Steels*. University of Kansas.

Mansjur, Z., & Suharto, M. F. (2024). Pengaruh Media Pendingin Post–Weld Heat Treatment (PERLAKUAN PANAS PASCA PENGELASAN) Terhadap Karakteristik Mekanik dan Struktur Mikro Baja Karbon Hasil Pengelasan Shielded Metal Arc Welding (SMAW). *Jurnal Mesin Nusantara*, *7*(1), 126-137.

Nasution, M., & Nasution, R. H. (2020). Analisa kekerasan dan struktur mikro baja aisi 1020 Terhadap perlakuan carburizing dengan Arang batok kelapa. *Buletin utama teknik*, *15*(2), 165-173.

Purbonugroho, H. D. A., Suprihanto, A., & Haryadi, G. D. (2023). Analisis Metode Pengelasan SMAW Terhadap Laju Korosi dan Nilai Kekerasan pada Baja Karbon Rendah AISI 1020. *Jurnal Teknik Mesin*, *11*(4), 227-234.

Romadhoni, L. F., & Aini, F. A. N. (2025). *Analisa Pengaruh Variasi Voltage dan Perbedaan Kawat Las GMAW terhadap Cacat Las pada Sambungan Fillet T Joint menggunakan Visual Test dan Penetrant Test*. https://doi.org/10.61132/mars.v3i4.919

Roslan, N. S., Hadzir, M. M., Ismail, I. F., Mat, M. N. H., & Yusup, E. M. (2024). A Review on The Effect of Post-Weld Heat Treatment (PERLAKUAN PANAS PASCA PENGELASAN) on Its Thermal Analysis and Mechanical Properties of Welded Metallic Pipe. *International Journal of Integrated Engineering*, *16*(2). https://doi.org/10.30880/ijie.2024.16.02.031

Santoso, E., Wahid, I., Zainun, Z., & Alfarisi, M. A. (2025). ANALISA PENGARUH VARIASI TEMPERATUR DAN WAKTU TAHAN PADA PROSES POST WELDING HEAT TREATMENT BAJA AISI 1020 TERHADAP SIFAT MEKANIK DAN STRUKTUR MIKRO. *MEKANIKA: Jurnal Teknik Mesin*, *11*(2).

Stephanie, N., & J, A. (2021). *Improvement of weld Heat Affected Zone (HAZ) using Taguchi method*. *2*(1), 027–033. https://doi.org/10.30574/WJAETS.2020.2.1.0020

Subagiyo, S. (2018). Analisis Kekuatan Tarik dan Kekerasan Baja Tahan Karat Martensitik Fasa Ganda Hasil Perlakuan Panas dengan Variasi Temperatur dan Media Pendingin. *Jurnal Teknologi*, *1*(1), 18-23.
