The screenshot shows a web browser displaying the article page for 'ANALISA POTENSI LAHAN UNTUK KOMODITAS TANAMAN KEDELAI DI KABUPATEN SITUBONDO'. The page includes a navigation bar with 'Jurnal Spectra' and links for 'Current', 'Archives', and 'About'. A search bar is located in the top right. The article title is prominently displayed in the center. Below the title, the author's name 'Kustamar' and affiliation 'Teknik Sipil (Teknik Sumber Daya Air) FTSP ITN Malang' are listed. An abstract section follows, describing the strategic importance of soybean as a food crop in Indonesia. To the right of the abstract is a thumbnail image of the journal cover. Further right, there is an 'Information' section with links for 'For Readers', 'For Authors', and 'For Librarians'. At the bottom right, a 'Visitors' section shows a list of countries and their respective visitor counts, along with a 'Pageviews: 12,491' and a 'FLAG Counter' logo.

## ANALISA POTENSI LAHAN UNTUK KOMODITAS TANAMAN KEDELAI DI KABUPATEN SITUBONDO

**Kustamar** -  
Teknik Sipil (Teknik Sumber Daya Air) FTSP ITN Malang

### Abstract

Kedelai merupakan komoditas tanaman pangan yang strategis dan memegang peranan penting bagi kehidupan masyarakat dan perekonomian Indonesia. Tahu, tempe, kecap, dan taucu sebagai produk pangan olahan yang berbahan baku kedelai selalu dihadirkan di meja makan hampir di seluruh rumah tangga Indonesia, baik di pedesaan maupun di perkotaan. Sejarah perkedelai Indonesia
